Custom Homes & Additions

BUILDING HOMES FOR OVER 25 YEARS

Whether we are building a custom home or one of our own designs, we don't build cookie-cutter homes. Our experience building many different styles of homes means that we know how to build any kind of home you want— one that will blend into the neighborhood you love, but won't look exactly like any other house on the block. In eclectic neighborhoods, we are sensitive to what will look good and harmonize perfectly with the area.

We place a high value on continuing education, and making use of the resources available through the Home Builders Association. This keeps us aware of the latest techniques and products. In fact, owner Mark Rasch sits as one of the Builder Directors for HBA Home Builders Association of St. Louis & Eastern Missouri and is a member of NAHB, National Association of Home Builders and Green Builders Council. Plus, we've been personally involved in the building of so many homes, we've acquired a depth of knowledge

and understanding about many different procedures and products. If we don't already know about it, we search it out and find the item that will meet your needs.

We believe that offering a Green built or "Smart" home alternative is another way to improve the quality and value of your home. Building Green is about best practices; the use of healthier and more efficient planning and construction from start to finish. In addition to the overall environmental benefits, there are many other great reasons to build a green home, including energy savings, a healthier and more comfortable living environment for your family, enhanced durability and reduced maintenance.

Additional Services:

- **Custom Home Building & Additions**
- **Project Management Services**
- **Will Build on Client/Private Lots**

Standard Energy Saving Features on all Benchmark Homes:
